

## Cards reset Rules

---

To reset your pack follow these simple steps.

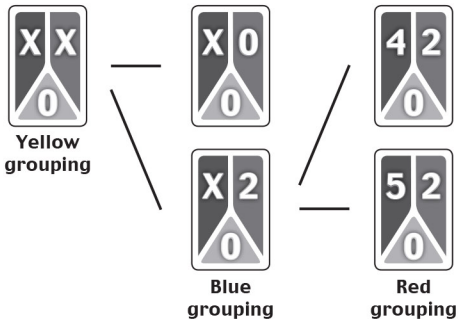

Go through the pack and sort the cards into Yellow groupings in ascending order, 0 to 9.

Then take each Yellow group and order the Blue number groupings in ascending order.

Lastly flick through each Blue group and order the Red numbers in ascending order. This can be done while sorting through the Blue groupings.

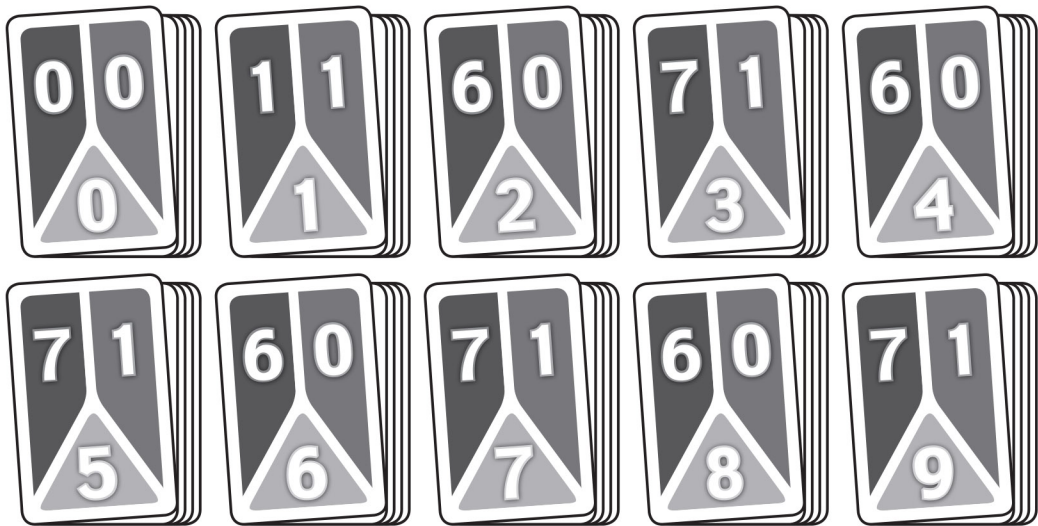

There are a total of 120 cards each uniquely numbered.

Example:

## Cards reset Layout

Note that Yellow 4's are separated into 2.  
6,0,4 to 5,4,4 and 7,4,4 to 3,9,4. This is because all  
120 cards are separated into 2 packs.
