Set-up and Fast Play Rules

2 – 6 players

Set-up

If you've just opened this PDF for the first time you will need to print off this game on to plain A4 sheets in colour, preferably on to card. You will need a total of 24 sheets. Set printer to borderless or to scale to fit for all sheets.

The next process is cutting, if a child please get an adult to help out. You can use scissors or if you have one an A4 Trimmer, follow the  symbol to cut in a straight line.

Fast Play Rules – 20 minute run round

Before starting the game divide up the cards into 3 coloured packs, Purple (LOL Cats), Green (LOL Dogs) and Grey (LOL Words). Shuffle these 3 packs separately and place all 3 down in the centre of the table on top of the "Table Card Pile Layout" sheet.

Then going clockwise starting from the player to the left of the person who shuffled the cards, each player picks up the top card from the "LOL Cats" Purple pile. Then 4 "Words" cards from the Grey pile.

Going round clockwise again from the person who picked up the first cards. Players have to choose which two "Words" cards to play with their chosen "LOL Cats" sentence card.

Players can only exchange one word card for another from the top of the pile if not happy with the "Words" cards. Leaving the one discarded "Words" card at the bottom of the "Words" pile.

The process should take around half an hour, but once done you have the game to play any time and no longer need to print it out again. If you really want you could cut round the corners but this would add on to the time to get the game ready.

Once done you should have a total of 200 cards. Plus this Rules sheet, packaging and a table layout sheet to place the three card piles on to.

Players then read out their sentence cards with their chosen "Words" cards, filling in the blanks on the "LOL Cats" sentence card.

The one with the most laughs wins the round and keeps their sentence card. All "Words" cards in players hand go to the bottom of the "Words" pile. Losing "LOL Cats" sentence cards go to the bottom of the pile.

Next players pick up the "LOL Dogs" Green cards from the pile and the person to the left of the winner picks up the first cards from the piles. This process of swapping from Cats to Dogs piles and vice versa continues until all sentence cards have been used or the 20 minutes are up for the players.

There can be multiple winners, winner with most "LOL Cat" cards and winner with most "LOL Dog" cards or total winner with top number in both Cats & Dogs.
